## Sustainable Design Consulting

### Wheelock College Campus Center and Student Residence Boston, Massachusetts

This 60,000 sf, fast-track, new construction will provide a seven-floor campus center and student residence hall for a 121-year old private college in Boston with 1,000 students. The project's sustainable strategies include day-lit common areas, low-flow fixtures and monitored construction waste management. Building completion, tenancy and LEED certification is expected in 2009.

For Wheelock College, The Green Engineer provided:

- Sustainable design advice including design review and material selection;
- Full-service coordination and management of the LEED certification process;
- Energy modeling services.

Client: Wheelock College  
Architect: William Rawn Associates
